

Team Involvement in Demonstration

Date	4 July 2026
Team ID	
Project Name	Comprehensive measure of well-being
Maximum Marks	1 Mark

Team Involvement in Demonstration:

This document records the active participation and roles of each team member during the project demonstration. It ensures that every member contributes meaningfully to the presentation and that responsibilities are distributed fairly and clearly.

S.No	Team Member Name	Role in Demo	Section Presented	Contribution Summary	Participation (Active / Passive)
1	B.Radha	Project Lead & ML Developer	Introduction, Value Proposition, & Project Overview	Delivered the opening project pitch, established the business problem concerning development-policy timelines, and summarized high-level objectives.	Active
2	B.Radha	Frontend UI Engineer	Glassmorphic Interface & Layout Walkthrough	Demonstrated the live web application interface, interactive user layout elements, client-side input validations, and response card components.	Active
3	B.Radha	Backend System Architect	Core Routing Engine & Model Pipeline (app.py)	Walked through the Flask routing architecture, internal indicator boundary clamp array checks, and the Scikit-Learn HDI.pkl model prediction cycle.	Active
4	B.Radha	DevOps Engineer	Local Testing Logs & Ngrok Tunnel Deployment	Conducted the terminal runtime execution walkthrough, demonstrating the secure initialization of the Ngrok edge node gateway and local environment builds.	Active

S.No	Team Member Name	Role in Demo	Section Presented	Contribution Summary	Participation (Active / Passive)
5	B.Radha	Technical Reviewer	Strategic Roadmap & Future Planning	Presented the systemic transition framework toward persistent cloud databases and long-term time-series trajectory models.	Active

Team Coordination Notes:

Aspect	Details
Team Member / Coordinator	B.Radha
Overall Team Coordination Rating (1-5)	5
Any issues during demo	A brief, temporary drop in local network stability occurred right as the live public evaluator connection loop was being initiated.
How issues were resolved	B.Radha seamlessly adapted the presentation, continuing to explain the structural significance of the FEATURE_BOUNDS validation array code block while cleanly resetting the automated run_public.py gateway wrapper to clear the network buffer.
